## **PSaizi NeuroTech - EEG Report**

### **Patient Information**

Name: Aarav Sharma

Age: 34

Gender: Male

Recording Duration: 10 hours

Device Used: Clarity EEG Pro 16-channel

Location: Home-based EEG monitoring

Symptoms Reported: Patient mentioned experiencing frequent episodes of dizziness, tingling sensations in the limbs, and occasional memory lapses.

### **Referring Doctor**

Dr. Neelam Verma, MD (Neurology)

License No: NV202512345

### **Detected Seizure Activity**

- Time: 02:13:45, Duration: 30s, Notes: Spike and wave activity detected
- Time: 06:25:10, Duration: 45s, Notes: Sharp transients suggestive of seizure onset

### **Neurologist Observations**

- The EEG recording shows periods of abnormal activity, particularly during early morning hours.
- There are multiple episodes with epileptiform discharges localized to the left temporal region.

### **Conclusion and Recommendations**

- Findings are consistent with focal epilepsy. Further clinical correlation is advised.

- Recommend continued monitoring and follow-up with treating neurologist.
